

## Sticky Knowledge

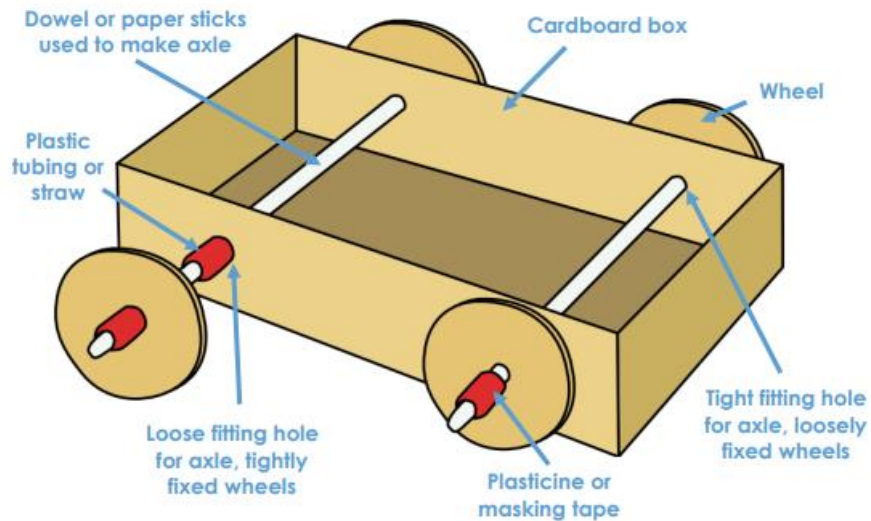

### Key Knowledge

Toys are more fun to use when the user engages with it.

Toy vehicles move using axles and wheels.

A wheel is a circular object which rotates on an axle.

An axle is a rod which passes through wheels.

### Design Criteria

Your moving toy train/car should

- Have working wheels which rotate.
- Have wheels fitted with an axle.
- Have an appealing design which looks like a real train/car.

### Key Vocabulary

wheel	A wheel is a circular object which rotates on an axle.
