

To change the narration to your home language, when you are on the homepage click the word "narration".

Select your home language.

Then all the books that have a translation in the selected language, will appear with a blue tab at the bottom of books available.

Select your book and your child can begin to read. At the bottom there is both an English translation which reads each page back in English and there is also your home language translation next to it, so parents can listen in their home language to help support their child if needed.
